New Issuance

'ilA+' Rating Assigned To Bond Issuance Of Up To NIS 26.5104 million N.V. Through A Future Private Placement Of Options Dated April 2019

S&P Maalot hereby assigns its 'ilA+' rating to bonds of up to NIS 26.5104 million par value to be issued by Partner Communications Co. Ltd. (ilA+/Stable) through the expansion of Series G by exercising non-tradable options (see our rating report published on April 17, 2019). The proceeds from the issuance will be used for the company's ongoing activity.

We believe there remains high, albeit moderating, uncertainty about the evolution of the coronavirus pandemic and its economic effects. Vaccine production is ramping up and rollouts are gathering pace around the world. Widespread immunization, which will help pave the way for a return to more normal levels of social and economic activity, looks to be achievable by most developed economies by the end of the third quarter. However, some emerging markets may only be able to achieve widespread immunization by year-end or later. We use these assumptions about vaccine timing in assessing the economic and credit implications associated with the pandemic (see our research on S&P Maalot website as well as on S&P Global Ratings website). As the situation evolves, we will update our assumptions and estimates accordingly.

For additional details about the rating and for additional regulatory requirements, see our rating report dated August 10, 2020.
